

The Impact of Covid-19 on Travel

Did Covid-19 have an effect on travel? Will people continue to travel? Will their vaccination status effect future travel plans?

Pre-Covid

Point 1

45% of those surveyed had visited between 1-5 states and 30% had visited between 6-10 states, before the pandemic.

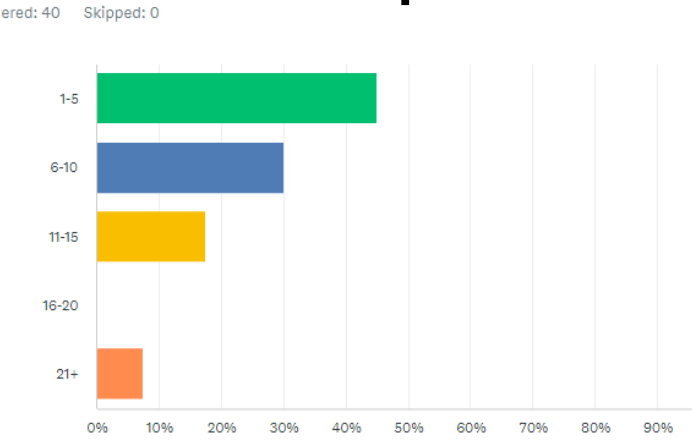

Point 2

87.5% of those surveyed had visited between 1-5 countries before the pandemic

Point 3

U.S. domestic travel increased 1.7% from 2018 to a total of 2.3 billion person-trips in 2019.

Number of states traveled to before the pandemic

Facts

Travelers spent \$242 billion on lodging, including hotels/motels/B&B, vacation homes and campgrounds, in 2019.

Post-Covid

Point 1

87.5% of those surveyed plan to travel domestically after the pandemic.

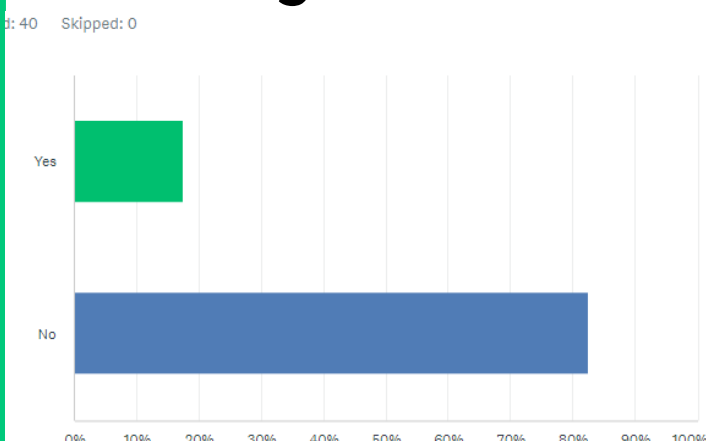

Point 2

70% of those surveyed plan to travel internationally after the pandemic.

Point 3

82.5% of those surveyed will not let their vaccination status affect their future travel plans.

Vaccination status affecting future travel

Facts

Travelers surveyed plan to stay in a hotel for their future travel.
